Description Lorazepam is a member of the benzodiazepine family. Benzodiazepines primarily work by enhancing the function of a certain naturally occurring brain chemical, gamma aminobutyric acid (GABA), that is responsible for inhibiting the transmission of nervous impulses in the brain and spinal cord. At the same time, the enhancement of GABA in the brain decreases symptoms associated with ...

- Short-term depletion effects are minimal, but failure to re-inoculate the GI tract with beneficial bacteria, also known as probiotics, often results in dysbiosis, which causes gas and bloating, decreases the digestion and absorption of nutrients, and may lead to a variety of other health problems.

Drug-Induced Nutrient Depletion: Are your prescription ...

Nicotinic acid, or niacin, in high doses (greater than 1 gram a day) could increase the risk of experiencing statin side effects.; Bile acid sequestrants may decrease the effectiveness of some statins. To avoid this, it may be recommended to separate your statin dose and bile acid sequestrant dose by at least four hours.

Be Aware of These Statin Drug Interactions

This test guide provides the drug half-life and time to steady state for many therapeutic drugs. It also provides guidance on how to use this information when monitoring therapeutic drugs.

Drug Half-Life, Steady State, and Recommended Sample ...

Linezolid is an antibiotic used for the treatment of infections caused by Gram-positive bacteria that are resistant to other antibiotics. Linezolid is active against most Gram-positive bacteria that cause disease, including streptococci, vancomycin-resistant enterococci (VRE), and methicillin-resistant *Staphylococcus aureus* (MRSA). The main uses are infections of the skin and pneumonia ...
